

INTERNET SANS PEINE

PLUGIN XZOOMER

INSTALLATION INSTRUCTIONS AND CUSTOMIZATION

Hello and thank you for your download.

This plugin is installed in a sub-box or box

Step 1 :

Unzip the .zip file

Step 2 :

Copy the codes of the attached HTML files according to their indicated destinations

Step 3 :

Put the **zoomassets** folder on your server, at the root, via your FTP client

Step 4 :

Concerning the 4 images: they will have to be put in three sizes

- In the **images/original** folder in 1024px X 1024px named img1.jpg, img2.jpg, etc.
- In the **images/preview** folder in 400px X 400px named img1.jpg, img2.jpg, etc.
- In the **images/thumbs** folder in 80px X 80px named img1.jpg, img2.jpg, etc.

If you want to remove a photo in the Zoom POPUP you will have to remove from the HTML element:

```
<a href="xzoomer/images/gallery/original/img4.jpg"></a>
```

If you want to remove a photo in the Zoom LOUPE you will have to remove from the HTML element:

```
<a href="xzoomer/images/gallery/original/img4.jpg"></a>
```

To modify in the POPUP option the color of the bar below the zoomed image with the title of the photo you change the value on line L91 of the css / xzoom.css file I wish you every success in your project and in using this plugin.

I wish you every success in your project and in the use of this plugin.

Cordially

Dominique
