

## Template Architecte du Web : INSTALLATION

### Step 1

Open WebAcappella Responsive and import a project :  
**Sauvegarde Template Architecte du Web.waprj**

### Step 2

Upload the **plugins** file on your server via your FTP client.  
In this folder you will find the **css, images, js et fonts** folders.  
You can replace all images of the images folder with yours. Just be careful to keep the same files names.

### Step 3.0

#### Customization of the menu

Home/main menu is placed in an html element, in a box directly on the home page (index.html)

Select html element then click on the “édition du code html” button.

In the html code, change contact information and social networks links, and also add or delete code lines to add or delete tabs in your menu.

To customize the code more easily, copy it and edit it with a code editor such as NotePad ou SublimeText.

- Line 10 : change phone number
- Line 11 to 16 : change email adress
- Lines 37 to 40 : change tabs names and url of your site's pages.

To add a tab, simply copy/paste one of the lines.

- Line 48 to 50 : fill in your social networks ; if you do not wish to show your social networks, delete the 3 lines between the tags <ul>

To change icons display and aspect, change the “social.png” image, located in the **images** folder of the **Plugins** folder.

Once your changes are done, repeat this process with the pages menu, located in a sub-page of WARC. It will appear on every other pages of the site.

### Step 3.1

## Customization of the slider

Still in the home menu code, you can change the titles and subtitles texts in the lines 82 and 83, 89 and 90, 96 and 97.

Change the “en savoir plus “button url and its name in lines 84, 91 and 98.

### Step 3.2

To customize the menu and the slider even more, open the **styles.css** folder (Plugins => css)

- Line 20 and 21 : change logo size
- Line 27 : change top banner color
- Line 38 : change phone number text size
- Line 39 : change phone number text color
- Line 43 : change email text size
- Line 44 : change email text color
- Line 57 : change header image height
- Line 177 : change tabs color when overview
- Line 204 : change traits color under the tabs
- Line 212 : change inactive tabs color
- Line 213 : change tabs font
- Line 214 : change tabs size
- Line 215 : change tabs thickness
- Line 223 : change menu banner color and opacity
- Line 239 : change color and thickness of little squares surrounding social networks icons
- Line 454 : change slider browsing traits color
- Line 462 : change active slider browsing traits color
- Line 499 : change social network icons color and « en savoir plus » button when overview
- Line 510 : change button text color when overview
- Line 520 : change slider title banner color
- Line 522 : change slider title font
- Line 523 : change slider title size
- Line 524 : change slider title color
- Line 529 : change slider subtitle font
- Line 530 : change slider subtitle color
- Line 532 : change slider subtitle size
- Line 537 : change slider button color and border thickness
- Line 538 : change slider button text color
- Line 540 : change slider button text size

## Step 4.0

### Customisation of the services Plugin

In WARC, html code is placed on the homepage in an html element.  
Select the html element and click on the “édition du code html” button.

For each service, you have a title in a <h4> tag and a small text in <p> tag.  
You can easily change these texts.

## Step 4.1

To customize even more the services plugin, open the **styles.css** file (Plugins => css)

- Line 562 : change per default color for icons 1 and 3
- Line 579 : change icons 1 and 3 color when overview
- Line 609 : change per default color for icons 2 and 4
- Line 620 : change icons 2 and 4 color when overview
- Line 647 : change 1 and 3 titles color
- Line 648 : change titles size
- Line 652 : change titles 2 and 4 color
- Line 655 : change texts color
- Line 656 : change texts size
- Line 657 : change space between titles and texts
- Line 661 : change points color above services
- Lines 671, 681 and 691 : change points color and thickness above services

## Step 5.0

### Customization of the images Slider

In WARC, html code is placed on the homepage in an html element.  
Select the html element and click on the “édition du code html” button.

For each service, you have a title in a <h4> tag and a small text in <p> tag.  
You can easily change these texts in the html code.

## Step 5.1

To customize even more the services plugin, open the **styles.css** file (Plugins => css)

- Line 897 : change filter color and opacity when overiewing images
- Line 990 : change titles size
- Line 991 : change titles font
- Line 992 : change titles color
- Line 995 : change space between texts lines
- Line 996 : change texts color
- Line 997 : change texts font
- Line 998 : change texts size

## Step 6.0

### Customization of the Team Plugin (équipe)

In WARC, html code is placed on the A propos page in an html element. Select the html element and click on the "édition du code html" button.

For each person, you have a title (Name/Nom) in a <h4> tag, and a function (small text) in <p> tag.

You can easily change these texts in the html code.

## Step 6.1

To customize even more the services plugin, open the **styles.css** file (Plugins => css)

- Line 1146 : change frame thickness and color
- Line 1151 : change frame color when overview
- Line 1166 : change names color
- Lines 1167 : change names font
- Lines 1168 : change names size
- Line 1171 : change profession color
- Line 1195 : change profession size
- Line 1196 : change profession font

## Step 7.0

### Customization of the gallery

In WARC, html code is placed on the Projets page in an html element. Select the html element and click on the "édition du code html" button.

For each image you have a block of code like this one :

```
<li class="grid">
  <a href="#image-1">
    <figure class="effect-apollo">
      
      <figcaption>
      </figcaption>
    </figure>
  </a>
  <div class="lb-overlay" id="image-1">
    
    <div class="gal-info">
      <h3>Villa Jolie</h3>
      <p>Neque porro quisquam est, qui dolorem ipsum
      quia dolor sit amet, consectetur, adipisci velit,
      sed quia non numquam eius modi tempora incidunt ut
      labore et dolore magnam aliquam quaerat voluptatem.</p>
    </div>
    <a href="projet.html" class="lb-close">Retour</a>
  </div>
</li>
```

- **Image identifier** (you can write what you want provided the name is unique. But it is necessary to find the same name 4 times in the image code block.)

- **Name of used image** (first one is displayed when landing on the project page, second one is the one displayed when clicking on the image. You can then upload two different images).

- **Image title**

- **Image descriptive text**

- Page url when clicking on the “retour” button

- « retour » button text

### Step 7.1

To customize even more the services plugin, open the **styles.css** file (Plugins => css)

- Line 1463 : change picture frame borders thickness and color
- Line 1464 : change picture frame angle
- Line 1479 : change pictures titles color
- Line 1480 : change pictures titles font
- Line 1481 : change pictures titles size
- Line 1489 : change descriptive texts color
- Line 1491 : change descriptive texts size
- Line 1493 : change descriptive texts font
- Line 1499 : change filter color and opacity in background
- Line 1502 : change “retour” button color
- Line 1542 : change filter color when overview
