

Magic Hover Pack 2 : INSTALLATION

Step 1

Unzip the .zip file

Step 2

Upload the **magicHoverP2** file on your server via your FTP client.

Step 3

The magicHoverP2folder contains a **css** folder and an **images** folder.

Step 4

In the images folder, you can place the images that you want, no specific dimension is required. The image will adapt automatically.

Please note that this pack does not allow to change bubbles size.

Step 5

Open the **code propriete de la page.html** file with a code editor such as NotePad or TextWrangler and copy/paste it in the settings of the page on which you want to display the plugin.

Step 6

As there are many different effects and therefore different code, we found it wise to provide you this internet page for you to choose the code that you like: <https://tontondueweb.com/previews-warc/noticeCode-magicHover/>

You just have to copy the code under the desired effect and to paste it in an html element on your page. You can freely place several different codes on the same page.

For example, and even if there are variations, the elements that you can change are always the same:

```
<center>
  <div class="ih-item circle colored effect11 left_to_right"><a href="#">
    <div class="img"></div>
    <div class="info">
      <h3>Votre titre</h3>
      <p>Une super description ici !</p>
    </div></a></div>
</center>
```

- Replace the # with URL of the page towards which user is redirected if he clicks on the image. If it's a page of your site, you can write for example : *services.html*

- This is the image name

- There the title

- Then the description

Etape 7

Customization of the CSS

To customize the plugin even more, open the **ihover-rond-p2.css** file (magicHoverP1 => css).

Effect 11 :

- Line 86 : round color when overview
- Line 97 : title color
- Line 98 : title font
- Line 99 : title weight
- Line 101 : space between letters in title
- Line 102 : title size
- Line 106 : shadow under title

- Line 109 : description color
- Line 113 : description size
- Line 114 : thickness and color of the trait above description

Effect 12 :

- Line 247 : round color when overview
- Line 264 : title color
- Line 265 : title font
- Line 266 : title weight
- Line 268 : space between letters in title
- Line 269 : title size
- Line 272 : shadow under title

- Line 275 : description color
- Line 278 : description size
- Line 279 : thickness and color of the trait above description

Effect 13 :

- Line 420 : round color and opacity when overview (rgba code corresponds to rvg code for the first 3 numbers. The last one corresponds to opacity. 0 = transparent, 0.9 = opaque)
- Line 433 : title color
- Line 434 : title font
- Line 435 : title weight
- Line 437 : space between letters in title
- Line 438 : title size
- Line 442 : shadow under title

- Line 449 : description color
- Line 453 : description size
- Line 454 : thickness and color of the trait above description

Effect 14 :

- Line 569 : round color when overview
- Line 580 : title color
- Line 581 : title font
- Line 582 : title weight
- Line 584 : space between letters in title
- Line 585 : title size
- Line 589 : shadow under title

- Line 592 : description color
- Line 596 : description size
- Line 597 : thickness and color of the trait above description

Effect 15 :

- Line 777 : color
- Line 793 : title color
- Line 794 : title font
- Line 795 : title weight
- Line 797 : space between letters in title
- Line 798 : title size
- Line 802 : shadow under title

- Line 805 : description color
- Line 809 : description size
- Line 810 : thickness and color of the trait above description

Effect 16 :

- Line 838 : round color when overview
- Line 847 : title color
- Line 848 : title font
- Line 849 : title weight
- Line 851 : space between letters in title
- Line 852 : title size
- Line 856 : shadow under title

- Line 859 : description color
- Line 863 : description size
- Line 864 : thickness and color of the trait above description

Effect 17 :

- Line 936 : title color
- Line 937 : title font
- Line 938 : title weight
- Line 940 : space between letters in title
- Line 941 : title size
- Line 945 : shadow under title

- Line 948 : description color
- Line 952 : description size
- Line 953 : thickness and color of the trait above description

- Line 960 : round color and opacity when overview (rgba code corresponds to rvb code for the first 3 numbers. The last one corresponds to opacity. 0 = transparent, 0.9 = opaque)

Effect 18 :

- Line 991 : round color when overview
- Line 1008 : title color
- Line 1009 : title font
- Line 1010 : title weight
- Line 1011 : space between letters in title
- Line 1012 : title size
- Line 1016 : shadow under title

- Line 1019 : description color
- Line 1023 : description size
- Line 1024 : thickness and color of the trait above description

Effect 19 :

- Line 1089 : round color and opacity when overview (rgba code corresponds to rvb code for the first 3 numbers. The last one corresponds to opacity. 0 = transparent, 0.9 = opaque)
- Line 1105 : title color
- Line 1106 : title font
- Line 1107 : title weight
- Line 1109 : space between letters in title
- Line 1110 : title size
- Line 1114 : shadow under title

- Line 1117 : description color
- Line 1121 : description size
- Line 1122 : thickness and color of the trait above description

Effect 20 :

- Line 1149 : round color when overview
- Line 1177 : title color
- Line 1178 : title font
- Line 1179 : title weight
- Line 1181 : space between letters in title
- Line 1182 : title size
- Line 1186 : shadow under title

- Line 1189 : description color
- Line 1193 : description size
- Line 1194 : thickness and color of the trait above description
