

INTERNET SANS PEINE

PLUGIN GALERIE FULL PAGE INSTALLATION INSTRUCTIONS AND CUSTOMIZATION

Hello and thank you for your download.

This plugin is installed in a box, this box should be at the top of the page.

If you want to add text, a button or any other element on the page, the other boxes will be in the lower position.

Step 1 :

Unzip the .zip file

2nd step :

Copy the codes of the attached HTML files according to their indicated destinations.

Step 3:

Put on your server, at the root, via your FTP client, the **gfp** folder

Step 4:

Attention it will take 2 sizes of photos, deposit them via your FTP client in the file **gfp / images:**

- (jpg 120px X 120px) naming them from img1-thumb to imgX-thumb
- (jpg 2560px X 1440px) naming them from img1 to imgX

Step 5:

To add or remove photos you will need to insert or delete the lines:

```
<div id="img-8" data-img-id="8" class="img-wrapper" style="background-image: url('gfp/images/img8.jpg')"></div>
```

et

```
<li data-thumb-id="8" class="thumb" style="background-image: url('gfp/images/img8-thumb.jpg')"></li>
```

In case of adding photos it will be necessary to customize the identifiers (numbers in blue)

I wish you every success in your project and in the use of this plugin.

I remain at your disposal for any questions and help, do not hesitate to contact me if necessary.

Cordially

Dominique
